Frontend Engineer building and improving web products since 2018. I work across product interfaces, shared frontend architecture and delivery. I also design AI-assisted development workflows, with human review and testing of the results.

Experience

Senior Frontend Engineer

April 2023 to present

Navigos Group Vietnam

I share core frontend work across recruitment products. My current product work includes VietnamWorks JobSeeker pages.

- Build recruitment-product interfaces and shared frontend foundations across product squads.
- Own key frontend work for a landing-page builder with templates, reusable blocks, responsive previews and draft/publish flows.
- Build requirement collection for AI-assisted job posting with backend and product teams.
- Shape a shared development harness for native coding agents, connecting scoped project context, design inspection, isolated workspaces and QA handoff. Direct agent-assisted implementation and validate the workflow in local product development.
- Contribute shared state-management and typed-translation foundations, review code, guide frontend decisions and mentor a junior teammate.

Web Developer

August 2019 to March 2023

Navigos Group Vietnam

I built and modernized recruitment interfaces and tools used by consultants and recruitment teams.

- Developed candidate search, profiles, shortlisting and application-review workflows.
- Modernized long-running frontends and built internal consultant, CRM and browser-extension tools connecting sourcing activity with company data.
- Implemented supporting NestJS and Express APIs where product workflows required them.

Web Developer

January 2018 to August 2019

EMG Edutech

I developed features for an online learning platform and responsive websites.

- Developed lessons, quizzes, discussions, real-time notifications and integrations with internal management tools.
- Built responsive Angular features, supporting NestJS services and custom WordPress websites with attention to usability, SEO and content management.

Selected work

Development harness and agent tools

A shared workflow for project context, Figma inspection, fixed task workspaces and native UI/API checks, with evidence for review and QA handoff. Used locally across two recruitment products; still stabilizing.

I shape the architecture and workflow requirements, direct agent-assisted implementation and validate the results in local product development.

Public tools: Figma Lens, Outline CLI, Jira CLI, Relay. I define their workflows and interfaces, direct agent-assisted implementation, test behavior and write the operating instructions.

Recruitment page builder

Templates, reusable blocks and responsive previews for branded recruitment and campaign pages.

I own key frontend work on the authoring workflow as part of the product team.

UWANT Vietnam

2026 to present

A product website for exploring cleaning appliances, comparing models and finding support.

I develop and maintain the custom WordPress website, including inquiry forms, deployment and checks after release.

uwant.com.vn

FIX Partner

A software company’s website rebuilt with editable pages and its existing blog preserved.

I led requirements, architecture and migration planning, client feedback, acceptance checks and deployment, with agent-assisted implementation.

14 pages and 135 posts migrated without content loss.

fixpartner.co

Skills

Frontend: React, Next.js, Angular, SvelteKit, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Ant Design.

Architecture and delivery: Frontend architecture, Monorepos, Turborepo, Microfrontends, Module Federation, Shared components, Code review, Core Web Vitals, SEO.

Supporting experience: Node.js, NestJS, Express, REST APIs, PostgreSQL, MongoDB, Docker, Nginx, CI/CD, WordPress, Payload CMS, Strapi, Browser extensions.

Agent workflows: Workflow requirements, Deterministic tool contracts, Bounded context, Guarded writes, Human review, Visual evidence, Agent skills and instructions.

Education and languages

Computer Science studies, Ho Chi Minh City International University, 2012 to 2016.

Vietnamese: native. English: intermediate.
